

Payback Period & Commercial Terms

OptiFlow Allocation & Replenishment System — Addendum to Business Impact Statement

Prepared for: Centre For Sight — Leadership Review

Prepared by: DEKODE | Aug 2026

1. Payback Period — at ₹8,47,318

Based on external revenue benchmarks (Business Impact Presentation) — **₹1.8 Cr** recoverable annual value and **₹1.2 Cr** one-time working capital unlock — against a delivery cost of **₹8,47,318**:

Basis	Payback	Year-1 ROI
Recurring benefit only (₹1.8 Cr/yr)	~0.56 months (~18 days)	21.4x
Including one-time WC unlock (₹1.2 Cr)	~0.34 months (~11 days)	35.7x

Note: the ₹1.8 Cr recoverable annual value already includes the profit-equivalent of the stock-out recovery. It is not additive with the separately-modelled “incremental annual profit” figure shown elsewhere in the presentation, to avoid double-counting the same benefit.

2. Pricing Contract — Commercial Terms

2.1 Implementation Fee

Item	Amount
One-time delivery / implementation cost	₹8,47,318 (+ applicable GST)
Payment schedule	40% on signing · 40% on UAT sign-off · 20% on go-live

2.2 Warranty Period — 2 Month from Go-Live

- **Coverage:** All defects, bugs, or deviations from the agreed functional specification are fixed at no additional cost.
- **Includes:** Bug fixes, logic errors in allocation/replenishment calculations, and integration issues traced to DEKODE's build.
- **Excludes:** New feature requests, scope changes, or issues caused by client-side data/process changes during the warranty window — handled as change requests, priced separately.

2.3 Infrastructure & Licensing — Client-Borne

- Hardware, Cloud hosting, and any third-party software licenses are invoiced directly to the client or passed through at cost, itemized separately from the implementation fee.
- DEKODE will provide an infrastructure cost estimate before go-live.
- Client is responsible for renewal of any licenses/subscriptions beyond the initial term.

2.4 Post-Warranty Support — Case-by-Case Basis

- No fixed AMC commitment under this contract.
- Support requests after the 2-months warranty are scoped and quoted individually — either as a fixed quote per request (defined scope) or time & material (open-ended investigation/support).
- A reference T&M rate is agreed at contract signing, even though usage is case-by-case, to avoid negotiation friction later.
- A response-time SLA for case-by-case requests (e.g., acknowledgment within 2 business days) applies even without a retainer.

2.5 Out of Scope (explicitly)

- New deployments.
- New feature developments.
- Data migration/cleanup beyond what is needed for the go-live.
